

Data flow from HCC LDM to NWS PRH and HFO

L/X

Imagery and products post-processed to netCDF

Arrows indicate direction of traffic request; LDMs communicate in both directions regardless of request/allow arrangement

This same setup is believed applicable to AWIPS II. The data partition is mounted on george and gracie. The NAS is accessible from both these servers.

U. Wisconsin will use this LDM to send other GOES-R Proving Ground products both to the WFO and PRH (via WFO)
