Air Force Base in California  
**Nov. 10, 2017, at 1:47 a.m., PST**

# Why JPSS?

Improves global numerical weather prediction model skill

Microwave imagery from ATMS helps identify characteristics of tropical cyclones

NUCAPS profiles can complement radiosondes

Day-night band imagery illuminates nighttime scenes for meteorologists

Better, Better, Better:

To the Near-Infrared, and Beyond!

Don't overlook these GOES-16 bands:

- “Snow/Ice” Band 5 (1.6  $\mu\text{m}$ )
- “Shortwave Infrared” Band 7 (3.9  $\mu\text{m}$ )
- “Dirty Longwave Infrared” Band 15 (12.3  $\mu\text{m}$ )

**GOES-16 ABI**  
**Visible “Red” Band 2**  
**0.64  $\mu\text{m}$**

21:02 UTC to 23:32 UTC  
10 September 2017  
“CONUS” sector (5 min interval)

**GOES-16 ABI**  
**Near-IR “Snow/Ice” Band 5**  
**1.61  $\mu\text{m}$**

21:02 UTC to 23:02 UTC  
10 September 2017  
“CONUS” sector (5 min interval)

225  
103  
102

# GOES-16 ABI Visible "Red" Band 2 0.64 $\mu\text{m}$

23:02 UTC  
30 August 2017  
"CONUS" sector

**GOES-16 ABI**  
**Shortwave Infrared Band 7**  
**3.9  $\mu\text{m}$**

21:27 UTC to 23:02 UTC  
30 August 2017  
"CONUS" sector (5 min interval)

Adopted from figure  
for future RMetS  
*Meteor. Appl.* article

Wed 21:27Z 30-Aug-17

# GOES-16 ABI Split Window Band Difference 10.3 $\mu\text{m}$ – 12.3 $\mu\text{m}$

21:27 UTC to 23:02 UTC  
30 August 2017  
"CONUS" sector (5 min interval)

Adopted from figure  
for future RMetS  
*Meteor. Appl.* article

# Preliminary, Non-Operational

GOES-16 imagery issues yet to resolve include:

- Time-consistent calibration for mesoscale and CONUS sector infrared bands
  - No, that storm isn't "pulsing"
- Allowing SBN/SCMI reflectance values over 100%
  - Possibility as high as 127.5%
- Sending SBN/SCMI in Fixed Grid Format (FGF)
  - Testing underway

**GOES-16 ABI**  
**Clean IR Window Band 13**  
**10.3  $\mu\text{m}$**

23:22 UTC to 00:04 UTC  
10-11 September 2017  
"Mesoscale" sector (30 sec interval)

**GOES-16 ABI**  
**Visible “Red” Band 2**  
**0.64  $\mu\text{m}$**

18:01 UTC to 18:06 UTC  
10 September 2017  
“Mesoscale” sector (30 sec interval)

**GOES-16 ABI  
Near-IR Veggie Band 3  
0.86  $\mu\text{m}$**

# Satellite Information Familiarization Tool (SIFT)

Open Source Software from the Cooperative Institute for Meteorological Satellite Studies

## Basic Information

- Latest version is 0.9.4
- Free downloads available for Windows, Mac, and Linux operating systems
- Can display imagery from ABI (downloadable from CLASS) and AHI
- Supports training for predominantly the National Weather Service (NWS)

## Recent Developments

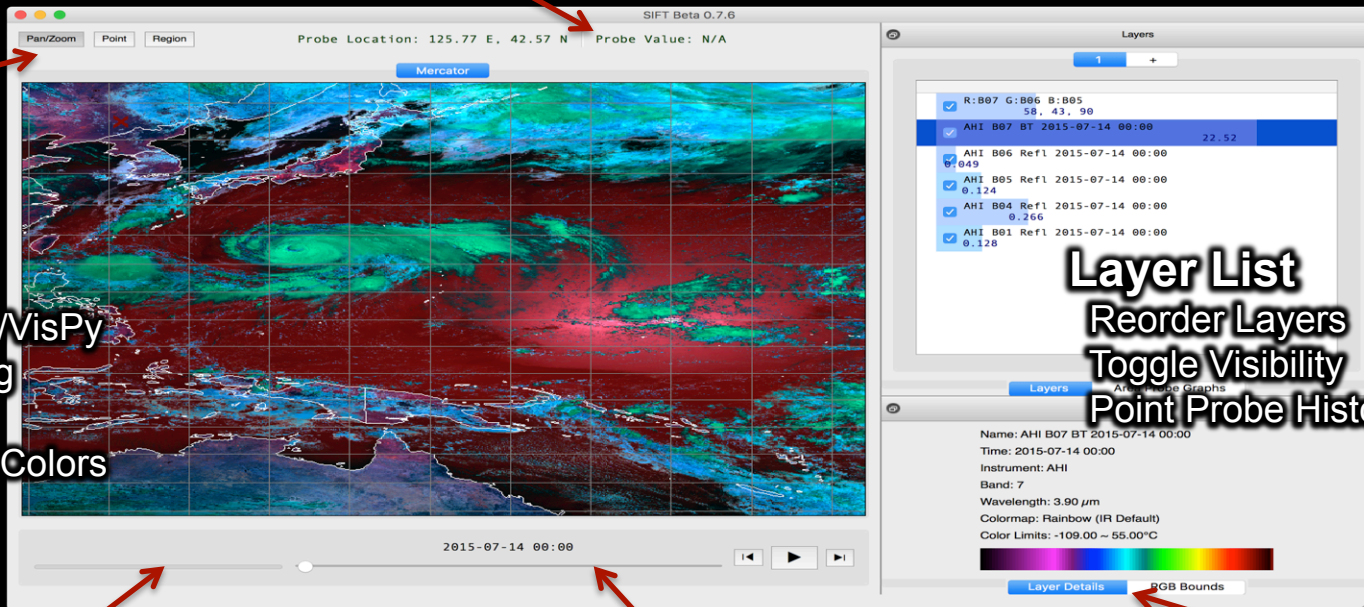

- Improved performance to handle multiple bands for multiple times over full disk
- Support for Lambert Conformal, Mercator, and geostationary map projections over CONUS and Pacific Basin
- Ability to customize imagery and produce RGB composites and band differences “on the fly”
- Can output image files

<https://sift.ssec.wisc.edu/>

# SIFT Features and Functions

## Point Probe Results

## Tools

- Pan/Zoom
- Point Probe
- Area Selector

## Map Display

- Powered by OpenGL/VisPy
- Panning and Zooming
- Dynamic Resolution
- Configurable Outline Colors

## Layer List

- Reorder Layers
- Toggle Visibility

## Point Probe Histogram

## Background Task Status

## Animation Control

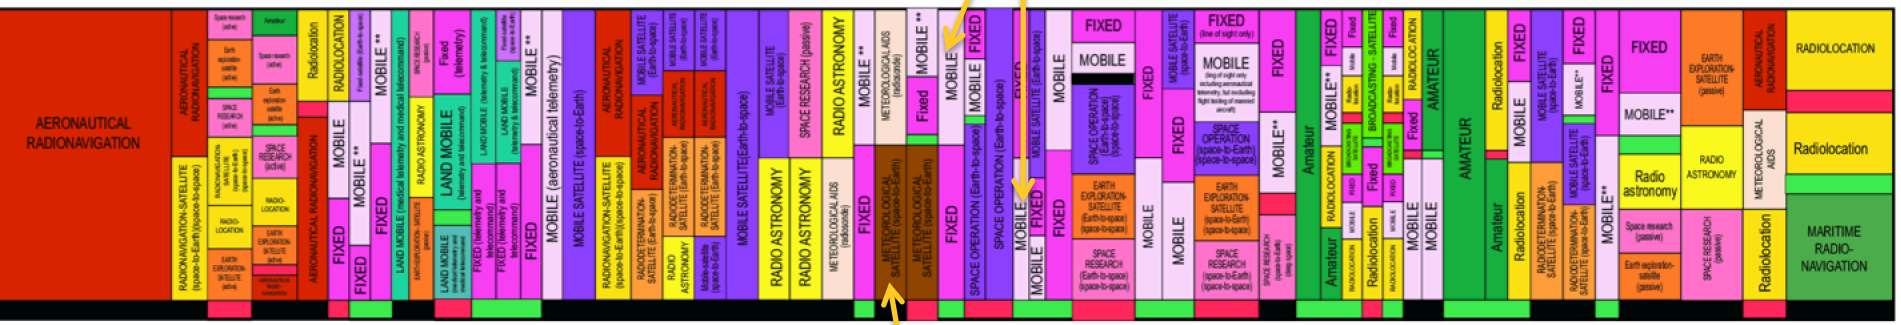

- Step-through or Autoplay
- Adjustable Speed Control

## Layer Metadata

- Band Information
- Color Bar and Limits

The background of the image consists of a dense pattern of thin, parallel diagonal lines. These lines are white and set against a black background, creating a halftone or hatched effect. The lines are oriented from the top-left to the bottom-right.

# NWA Advocacy

- “The NWA is concerned that radio frequency interference from strong terrestrial signals will disrupt the timely and reliable receipt of meteorological data in this spectrum, negatively impacting the readiness of American communities for severe weather.”
- “The NWA opposes sharing of the 1675-1680 megahertz spectrum and requests that it be DELETED from the bandwidth under consideration in the [MOBILE NOW Act] for fixed and wireless applications.”

NWA Letter to U.S. Senator John Thune,  
Chairman, Senate Committee on Commerce, Science, and Transportation  
2 March 2016
